ESP- Ensemble Streamflow Prediction
Based On Probability & Statistics

“The importance of a statistical average?”

*“ Then there is the man who drowned
crossing a stream with an average depth
of six inches. ”*

-- W.I.E. Gates

Probability

“It is a truth very certain, when it is not in our power to determine what is precise, we ought to follow what is most probable.”

Variation on a quote by:

-Rene Descartes

AHPS POTENTIAL PRODUCTS AND SERVICES

- 1. Common Suite of Products**
- 2. Customized User Products
Build Their Own From
ESPADP**
- 3. Futuristic Products Built
From the Database**

AHPS COMMON SUITE OF PRODUCTS

1. Prototype/Proposal by the Central Region

**Deterministic Stage and Forecast Hydrograph
Probabilistic Forecasts - Text and Graphic
(Examples will be shown on following slides)**

**RFCs can add local enhancements in addition to
a common suite of products.**

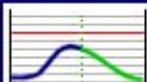

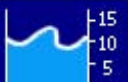

2. Details yet to be determined by National Team (Gregg Rishel)

BUILD YOUR OWN AHPS/ESP PRODUCT

The screenshot shows the website header with the NOAA logo and the text "NATIONAL WEATHER SERVICE Colorado Basin River Forecast Center". Below the header is a navigation bar with "Home", "News", "Organization", and a search box with a "Go" button. On the left side, there are links for "River Forecasts & Data", "Graphic", "List", "RCYC2 Data", "Hydrograph", and "RCYC2 Gage Info". The main content area features a grid of tool icons: "Hydrograph" (River Level Forecast Info), "Stage" (Weekly Chance of Exceedance), "Flow" (Chance of Exceedance During Entire Period), and "Volume" (Build a Product). A red arrow points to the "Build a Product" icon.
