

# Experimental Seasonal (Apr - Jul) CBRFC Forecast with direct insertion of estimated SWE from airborne lidar survey

Location: Dolores - Dolores (DOLC2)

Date of Flight: May 10, 2022

This experimental forecast product is provided for information purposes only and is not intended as an official forecast product of the Colorado Basin River Forecast Center (CBRFC). The experimental forecast shown in blue on the figure and provided in the table is created by running the Ensemble Streamflow Prediction (ESP) model after direct insertion of basin average snow water equivalent (SWE) from Airborne Snow Observatory Inc. (ASO) into the CBRFC's operational, calibrated, and lumped parameter snow model (SNOW-17). Please [contact](#) the CBRFC with any questions regarding these numbers or figures.

Forecast / Exceedance Value	ESP90	ESP70	ESP50	ESP30	ESP10
CBRFC Experimental Forecast 5/10/2022	134	141	149	156	170
CBRFC ESP Model Guidance 5/10/2022	129	131	137	142	163
April-July Observed Volume			136		

Probabilistic forecast volumes in thousands of acre-feet (kaf). Columns indicate exceedance values.
