

# Experimental Seasonal (Apr - Jul) CBRFC Forecast with direct insertion of estimated SWE from airborne lidar survey

Location: North Fork Gunnison - Somerset (SOMC2)

Date of Flight: March 27, 2025

This experimental forecast product is provided for information purposes only and is not intended as an official forecast product of the Colorado Basin River Forecast Center (CBRFC). The experimental forecast shown in blue on the figure and provided in the table is created by running the Ensemble Streamflow Prediction (ESP) model after direct insertion of basin average snow water equivalent (SWE) from Airborne Snow Observatory Inc. (ASO) into the CBRFC's operational, calibrated, and lumped parameter snow model (SNOW-17).

Forecast / Exceedance Value	ESP90	ESP70	ESP50	ESP30	ESP10
CBRFC Experimental Forecast 3/27/2025	183	210	223	238	270
CBRFC ESP Model Guidance 3/27/2025	152	181	200	214	245

Probabilistic forecast volumes in thousands of acre-feet (kaf). Columns indicate exceedance values.
